At the start of the game, you get three Cowboy Kidz to clean up the plains. As you ride through the levels, the bandits will jump out at you from just about anywhere-except where you expect them to be!

Steer your trusty old horse with the joystick and push fire to rattle off a shot. Clear out the bad guys to move onto the next level. Watch out for rocks and cactii, these will throw you off your horse and lose you a life.

BYTE BACK

As the bandits appear on both sides of the tracks, you'll need to cross from side to side to keep the train safe, but watch out for the hot coals that get dropped off the train every now and then – they're deadly. They appear on the tracks as the train moves on and you cannot get across the track until they have passed.

More Kidz become available as you improve your score, but on higher levels the terrain gets more difficult to ride across safely with broken bridges, amongst other things,

to contend with. In addition some of the bad guys might get onto the train and begin taking pot shots at you from there.

CONTROLS:

Use the joystick to steer the Kidz and their shots. On the title page joystick up/down selects music/fx. Push fire to begin playing after losing a life.

LOADING

Insert tape and push SHIFT and RUN/STOP together. The game will load and run automatically.
